

MEN Techniek is a young family business located in Rotterdam since 2009. The owner of MEN Techniek has experience in the petrochemical industry since 1983 and since 1995 in ship repairing and gantry cranes.

Since we started in 2009 we have grown from a small family business to a business with a number of permanent employees and a large group of regular subcontractors. As a family business we attach a great deal of importance to reliability, speed of service and above all taking over the concerns of our clients. Or, as we say in Rotterdam: "geen woorden, maar daden" (actions speak louder than words).

MEN Techniek specializes in the repair and maintenance of ships, cranes, pipelines, pumps and appendages. We offer a wide range of services, performed by experienced, motivated and qualified personnel. Speed, flexibility and precision are of utmost importance to us. 365 days a year, 7 days a week, 24 hours a day.

Our services

MEN Techniek is specialized in all forms of electrical or mechanical repair, maintenance and revision, both on ships and on terminals. Examples are:

- Sea fastenings;
- Welding, burning, jetting and flowing;
- Repairs and maintenance on ships, pumps, dockside and gantry cranes, pontoons and general repairs;
- Maintenance (both mechanical and electrical) of terminals;
- Exchanging and realigning pumps, gearboxes, motors and appendages;
- Fitting and construction work;
- Installing piping, power cables and hydraulic hoses and a variety of systems;
- Specialized welding work for lashing companies.

In addition we carry out a variety of types of NDT inspections (Non Destructive Testing), such as PMI inspection, magnetic inspection, penetrant inspection, ultrasonic inspection, visual inspection and radiographic inspection.

MEN TECHNIEK

REPAIR-, WELDING- PROJECT SOLUTIONS

On site or in the workshop

We perform most repairs on location. Besides this we have a new, well-equipped workshop. We perform work here such as dismantling gearboxes, assembling appendages, production of small steel constructions, welding work and mechanical work.

Our people

Whether we are talking about our permanent employees or flexible workers on call-up: all our personnel have extensive specialized experience within their field of work. Both MEN Techniek as a company and our individual employees are VCA certified. Besides this we are also a certified welding company and a registered training company for apprentices. Employees of MEN Techniek stand out not just for their craftsmanship, but also for their commitment to service. Working with you to find solutions, taking over your concerns, and flexibility are important keywords. We don't much care for empty promises and smooth talk: a promise is a promise.

Quality

MEN Techniek attaches great importance to its responsibility to perform work in a good, safe and environmentally correct way. The business processes of MEN Techniek have been documented and implemented according to the requirements of the following international standards and requirements: ISO 9001 'Quality management systems', VCA/SCC 'SHE Checklist Contractors' and ISO 3834-2 'Quality Requirements for fusion welding of metallic materials'. The aim is to continuously improve our performance; a periodical assessment of MEN Techniek by a Notified Body is part of this effort.
